Mobile Crusher

CRAWLER TYPE

Overview

Crawler type mobile crushing & screening plant is designed and researched by our experienced engineers according to the customers' requirement. It is of high cost performance, reliable & beautiful structure. Its technology is as advanced as the international level. It is widely used in road & bridge construction, metallurgy and other fields to crusher and screen.

Mobile Crusher

CRAWLER TYPE

Features

1. Perfect performance of Cummins diesel engine. It is low consumption, low noise, reliable performance. And we can equip a military cryogenic preheat starting device, so that the crushing plant can be started to work even the temperature is below 25 degrees centigrade.
2. The chassis adopts crawler rigid ship form structure. It is of high intensity, easy to be transported on the different landform like mountain and marsh.
3. It adopts the motor of high-torque and strong driving force. Crawling system adopts full-power variable open hydraulic system which is of excellent performance, high reliability. It is able to make full use of engine power. The main hydraulic components (pumps, valves, etc.) is imported from Japan.
4. Controlling system adopts imported and advanced servo system. It is easy and exact to be controlled to stepless crawl.
5. The crushing & screening plant adopts our company's advanced product. Its structure is compact. The screen is installed in 20 degree angle, so the screening is highly efficient.

Assembly

At this stage, all the pieces, parts, components and weldments that go into our various products are assembled. It's worth noting that some orders are built to customer and application specifications, some are built according to standardized designs.

Many different techniques-from handwork to the use of advanced technology-come into play during the final-assembly stage of our products.

As an example, consider how our crawler mobile crushing plants are put together.
