

## BREAK-DAY

### 产品简介

振动给料机在生产流程中，可把块状、颗粒状物料从贮料仓中均匀、定时、连续地给到受料装置中去，在砂石生产线中可为破碎机械连续均匀地喂料，并对物料进行粗筛分，广泛用于冶金、煤矿、选矿、建材、化工、磨料等行业的破碎、筛分联合设备中。

### 性能特点

振动平稳、工作可靠、寿命长；可以调节激振力，可随时改变和控制流量，调节方便稳定；振动电机为激振源，噪声低，耗电小，调节性能好，无冲料现象。

结构简单，运行可靠，调节安装方便，重量轻，体积小，维护保养方便，当采用封闭式结构机身时可防止粉尘污染。

## ◇ 振动给料机 ◇ Vibrating Feeder

### Brief introduction

The vibrating feeder is used to transfer the large size materials and granular materials from hopper to receiving device uniformly, periodically and continuously in the production flow, it also can feed materials into the crusher continuously and uniformly, and screen the materials in sand making and stone crushing production line. It is widely used to match the crushing and sieving equipments in many industries like metallurgy, mine, mineral dressing, building material, chemical, grinding, etc.

### Features

1. stable and long service life. 2. easy to adjust  
3. reliable operation. 4. easy maintenance. 5. no pollution.
